

Upcycling Craft

QV CHARGING DOCK

WHAT YOU'LL NEED

- QV 500ml bottle
- Scissors
- Sanding paper
- Paint of your choice

INSTRUCTIONS

1. Remove labels from product.
2. Remove cap/pump and wash the empty bottle with water.
3. Cut a horizontal line across the centre of the QV bottle, continue cutting on both sides of the bottle, leaving only the back intact (refer to image).
4. Carefully cut a hole in the back of the bottle, to fit the shape of your phone charger.
5. Sand any sharp edges back and ensure the bottle is completely dry.
6. Paint the bottle with the colour of your choice and leave to dry for a few hours.
7. Place the Charging Dock up against a powerpoint and plug your charger in through the hole, giving you a convenient place to leave your phone to charge.

Ego considers the safety of children a top priority. Adult supervision and assistance is required for any of the listed arts and crafts projects. Observe children closely and intervene as necessary to ensure safe and successful experiences.
