

# Upcycling Craft

## PIGGY BANK

### WHAT YOU'LL NEED

- QV Cream pump pack
- Scissors
- 5 x Corks or spare bottle lids
- Paint (pink)
- Paint (black)
- Hot Glue Gun
- Googly Eyes
- Pink Coloured Card

### INSTRUCTIONS

1. Remove all labels from the bottle and remove the pump (save for later).
2. Cut a coin sized rectangular opening on the centre of the bottle (this will become the top of the piggy bank).
3. Using the hot glue gun, attach the corks (or lids) to the opposite end of the coin opening as feet (4 corks/lids required).
4. Paint the body of the pig using the pink paint. You can also use pink paper to cover the body if you don't have paint.
5. Paint the feet using the black paint. You can also use a black marker for this step.
6. Use the coloured card to create the ears by cutting them into a pig ear shape, and sticking them onto the top of the bottle with a hot glue gun.
7. Use the pump top (painted pink) at the back of the bottle as a tail, and stick a bottle cap (painted pink) on the front for as nose. Draw on the nostrils with the black paint.
8. Attach the googly eyes above the nose.
9. Start saving!

Ego considers the safety of children a top priority. Adult supervision and assistance is required for any of the listed arts and crafts projects. Observe children closely and intervene as necessary to ensure safe and successful experiences.
